DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 11-12, 14-21, 24-27, 34, 38, 42, 46, 50, 56-57, 60, 62, 64, and 66, drawn to methods of treatment and compositions.

Group II, claim(s) 67-69, drawn to a method of validating a test.

Group III, claim(s) 70-73, drawn to a method of identifying a compound.

2. The inventions listed as Groups I - III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The method steps of one Group are not the same as those for either other Group and the method steps of one Group are not required for the practice of the method of either other Group. Therefore there is no special technical feature between the three groups.

3. If Group I is elected, this group contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

method of increasing and sustaining skeletal muscle formation

Art Unit: 1651

method of decreasing proliferation of skeletal muscle cells

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. If the species of increasing and sustaining skeletal muscle formation is elected, then Applicant is required to elect a single decreasing proliferation of skeletal muscle cells is elected, then Applicant is required to elect a single compound to practice this invention. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Claims 12, 14-16, 21, 34, 46, 60, 62, 64, 66 are directed to methods of increasing and sustaining skeletal muscle formation.

Claims 16-19, 38, 50 are generic to the species of an NO inhibitor and a regulator of NO production.

The following claim(s) are generic: 11, 20, 24-27, 42, 56-57.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Art Unit: 1651

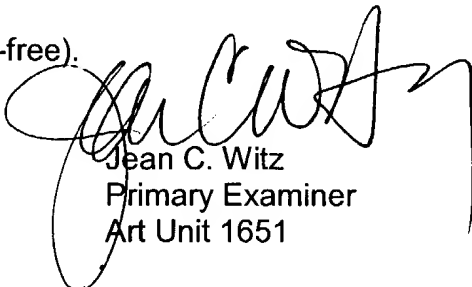

The species are directed to completely opposite effects. Therefore, the practice of one species would not be appropriate for a condition to be treated with the other species.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
